

Anil Kumar

QA Manager | Test Architect | Quality Engineering & AI-driven Automation Leader
Gurugram, Haryana | #91-9999749875 | ak108.mail@gmail.com | [LinkedIn](#) | [WebURL](#)

PROFESSIONAL SUMMARY

Senior QA Manager with 14+ years of experience leading Quality Engineering and Test Automation initiatives across Healthcare and Enterprise domains. Expertise in designing scalable automation frameworks using JavaScript, POM, BDD, and Data-Driven approaches. Hands-on experience leveraging AI-assisted tools including Copilot, Claude, Playwright Agents, and MCP-based workflows to improve productivity and testing efficiency. Strong experience in QA strategy, quality governance, CI/CD implementation, release management, risk-based testing, and healthcare compliance standards.

TECHNICAL SKILLS

- **Automation & Testing:** Playwright, Selenium WebDriver, Appium, REST Assured, Postman, Allure/HTML Playwright Reporters
 - **AI & GenAI Ecosystem:** GitHub Copilot, Claude, Cursor AI, Playwright Agents, Playwright MCP, JIRA MCP, Langflow(LangChain), RAG, ChromaDB, and CLI Tools
 - **Programming Languages & Frameworks:** JavaScript, Core Java, Cucumber BDD, TestNG
 - **CI/CD & DevOps:** GitHub Actions, Maven, and Docker
 - **Test Management & Agile:** JIRA, Xray, TM4J, Agile, and Scrum
 - **QA Leadership & Quality Engineering:** QA Strategy, Release Governance, Test Planning, Quality Gates, Defect Triage, Risk-Based Testing, SDLC, and STLC
 - **Healthcare & Compliance:** EMR/EHR, HIPAA, GDPR, and FDA 21 CFR Part 11
-

QA Leadership, Governance & Compliance

- Led team of 10+ QA engineers across Web, Mobile, and API programs
 - Supporting 2-4 week release cycles.
 - QA Strategy, Release Governance, Test Planning, and Audit Support
 - Quality Gate Reviews, Defect Triage, and Stakeholder Communication
 - SDLC, STLC, Defect Lifecycle, Agile/Scrum, and Risk-based Testing
 - Resource planning, quality KPIs, and stakeholder reporting for multi-release programs.
-

PROFESSIONAL EXPERIENCE

Medocity Inc., Gurugram – Sr. QA Manager, May 2017 – Present

- Spearheaded QA strategy and quality governance for AI-enabled healthcare and remote patient monitoring platforms, ensuring seamless patient-provider-care manager workflows across web and mobile surfaces.
- Architected a scalable Playwright Web & API automation framework (JavaScript, POM, Data-Driven) with parallel execution and CI/CD integration, reducing regression cycle time by over 40%.
- Pioneered AI-assisted testing workflows using Copilot, Claude, Playwright Agents, and MCP-based orchestration with RAG and prompt engineering techniques to improve test generation, failure analysis, and automation efficiency.

- Established release Quality Gates and shift-left testing practices, cutting production defect leakage and measurably improving release confidence across 2–4 week cycles.
- Led, mentored, and scaled a QA team of 10+ engineers, driving adoption of automation best practices, framework architecture standards, and AI-augmented testing methodologies.
- Championed healthcare compliance and audit readiness aligned with HIPAA, GDPR, and FDA 21 CFR Part 11, including IQ/OQ/PQ, RTM, and validation documentation.
- Strengthened release readiness through requirement validation, defect triage, stakeholder collaboration, and data-driven quality metrics reporting.

Experience Accomplishments:

- Designed AI-enabled QA workflows using multi-agent orchestration and MCP integrations (Playwright, JIRA, GitHub, API, File System) to improve automation productivity and execution efficiency.
 - Implemented RAG-based retrieval using Langflow, ChromaDB and prompt engineering strategies to enhance context-aware test generation and automation workflows.
 - Explored AI-assisted capabilities including LLM-based test scenario generation, failure analysis, defect pattern identification, and proof-of-concept agentic workflows for test optimization.
-

SBI Cards and Payment Services Ltd., Gurugram – QA Manager Jan 2017 – Apr 2017

- Rapidly onboarded into the Banking and Credit Card domain, gaining a deep understanding of digital payment ecosystems, authentication flows, and customer transaction journeys.
 - Led QA delivery for critical initiatives including Bharat QR and MPIN-based authentication, ensuring transaction accuracy, security compliance, and a seamless customer experience.
 - Managed QA team members across functional, integration, regression, and UAT testing phases within agile releases
 - Collaborated with product stakeholders on requirement analysis, test strategy, and risk assessment for digital payment capabilities.
 - Owned release validation, defect triage, and quality reporting, enabling on-time delivery of high-impact features.
-

NIIT Ltd., Gurugram – Sr. Test Engineer Jan 2012 – Jan 2017

- Contributed to enterprise-scale end-to-end testing programs for global clients, building a strong foundation in SDLC, STLC, Agile, and enterprise QA practices.
 - Developed robust Selenium WebDriver automation suites in Core Java and TestNG, achieving significant improvements in regression testing efficiency and coverage.
 - Executed multi-platform testing (Web, Mobile, API) across functional, integration, regression, smoke, and system levels for multiple concurrent releases.
 - Designed Hybrid and Data-Driven automation frameworks with reusable test components, enhancing test maintainability and reducing script maintenance overhead.
 - Collaborated closely with business analysts, developers, and stakeholders to translate requirements into comprehensive test scenarios and test cases.
 - Performed cross-browser and compatibility testing to ensure consistent user experiences across platforms and environments.
 - Built the technical and architectural expertise that formed the foundation for subsequent leadership roles.
-

KEY PROJECTS

V3 Platforms (Configuration Portal | Site Portal | MyCare Journey) – AI-enabled healthcare and remote patient monitoring ecosystem supporting patient engagement, care coordination, and clinical workflow management for HCPs, care teams, and patients. The platform spans role-based access control, patient monitoring, workflow automation, and secure healthcare communication, fully aligned with HIPAA, GDPR, and FDA 21 CFR Part 11 compliance requirements.

V2 Platforms (Provisioning | Provider Portal | HomeHealth) – Healthcare and remote patient monitoring platform designed for HCPs, care teams, and hospital chains. Encompasses account management, patient onboarding, workflow management, secure communication, and patient monitoring with full adherence to healthcare regulatory and compliance standards.

SBI Credit Card Application - Mobile-first banking application enabling credit card services and digital payment solutions. Delivered end-to-end testing and validation for Bharat QR payment functionality and MPIN-based authentication, ensuring transaction security, data accuracy, and a frictionless customer experience.

PDC System: PDC System is a SAP Hybris-based professional development and licensing management platform delivering structured and on-demand learning solutions for educators. Integrated with AWS S3, AES Admin, notification services, and reporting workflows, the system manages content licensing, analytics, and operations across web, mobile, and print channels — supporting multi-language, multi-currency catalogs at scale.

AWARDS & RECOGNITION

- **ACE of the Quarter Award** – Recognized for leadership, quality delivery, and managing critical client engagements.
- **Team of the Quarter Award** – Awarded for exceptional contribution to project success and collaboration.
- **Star of the Month Award** – Recognized for outstanding commitment and milestone delivery.
- **e-WOW Cards & Hats-off Certificate** – Appreciated for dedication, ownership, and high-quality execution.

EDUCATION

- Software Testing Certification – DUCAT (New Delhi)
- ANIIT – Advanced Diploma in Software Engineering – NIIT (New Delhi)
- B.Sc. (Information Technology) – Kuvempu University
- Higher Secondary & High School – UNIC, UP
